Committed to allocating our clients' capital responsibly but are not prescriptive in our approach.

Work with clients to identify the best strategy to meet their non-financial and financial goals.

Recognise that responsible investment can be approached in different ways and ensure investments are managed in a way that is consistent with individual investors' beliefs and values.

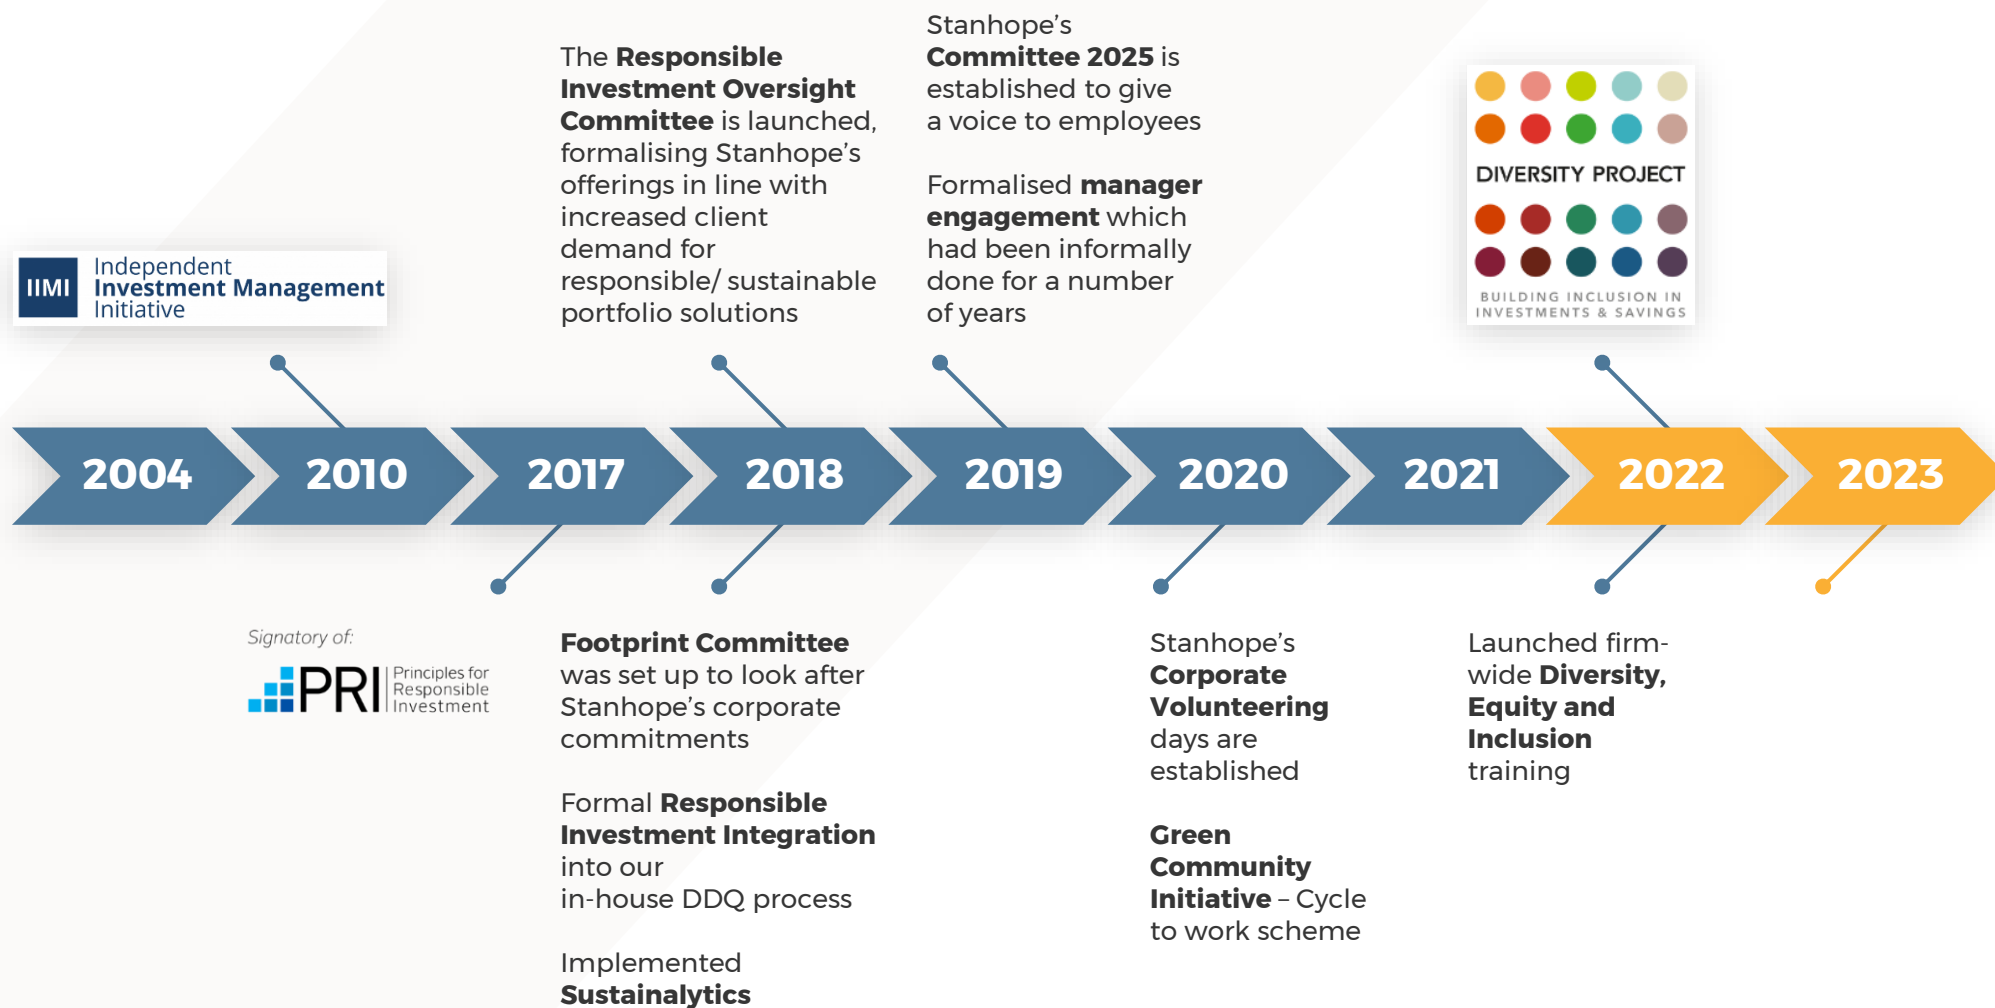

Thorough operational and investment due diligence processes which all investments must undergo allow us to screen managers before inclusion in portfolios

Routinely engage with managers to encourage a responsible investment approach.

France

The amount that is reasonable to invest depends on the personal circumstances of the Investor. To determine this, the Investor must consider his personal and family situation, his personal assets, his current and future needs, but also his aversion to risk. It is also strongly recommended to sufficiently diversify your investments in order to reduce the risks. Investors should inquire about this with their usual advisers (legal, tax or accounting) before any investment.

The different risk profiles can be adapted according to the allocation ranges by asset class agreed in the investment objectives defined with the client.

The reports provided by Stanhope Capital regarding the management of life insurance contracts are for information purpose only, this does not replace the statement from the insurance company which remains the only formal statement to be considered for audit, tax or other purposes.
